Air Inflatable Antennas

ACTION REQUIRED: Para 2

1. During 1957 the KUCLUB Supplemental Programs Division expressed considerable interest in air inflatable parabolic antennas manufactured by [REDACTED]. Antennas of this type are of particular interest to this Office for possible application in the HBLAURITE ELINT Program.

25X1

2. It is requested that this Office be provided with complete information on the current status of the inflatable antenna project. This information would be most helpful if it included a description of the types and sizes of antennas available, methods of feed, cost and availability.

FOR THE CHIEF, EUCA
